

# Southeast Queensland Drilling Tools and Equipment Specialist

Riding the wave of the flourishing Coal Seam Gas (CSG) industry, this southeast Queensland business has quickly become a key service provider to an extensive client base of drilling contractors in Queensland and New South Wales.

The business specialises in the service, maintenance, sale and rental of tools, componentry and equipment used for CSG drilling and exploration - from PDC bits and Down Hole Motors to Fishing Tool equipment.

Its various capabilities, extensive spare parts & product catalogue, and highly regarded expertise in servicing specialised CSG equipment has seen the business become an integral provider to small-medium sized drilling contractors in both states.

In an industry where minimising equipment downtime is a make-or-break priority; the business has built a reputation for efficient reliable service, expert knowledge and the capacity to offer clients a broad scope of servicing, repair, and sale or rental solutions.

The business operates from an industrial area in Brisbane's southern suburbs. The secure premises consists of two adjoining workshops and offices with the location offering easy access to the wider metropolitan area as well as positioning the business in close proximity of many of its key clients.

Queensland's CSG industry is poised to experience considerable growth in the immediate future. Economic studies suggest the expansion of the CSG industry in the state will generate over 18,000 jobs, increase gross state product revenue by over \$3 billion and generate private sector investment of over \$45 billion.

Having already cultivated its own secure niche within the sector, this business is your opportunity to jump on-board with a well-established operator offering direct access to one of Australia's fastest growing and potentially lucrative industries.
